Staff at the Bermuda Cancer and Health Centre have recently honed their skills by completing a refresher course to help improve

A spokeswoman for the cancer charity said its team of technologists took a refresher course in mammography positioning training "the latest techniques and methodologies", including the Miller Method, to enhance the care they offer.

The Miller Method, developed by Louise C Miller, focuses on proficient mammography positioning to improve accuracy, reduce po

A spokeswoman for the charity said: "By maintaining proper body ergonomics, our technologists also ensure longevity in their car

"This commitment to ergonomic practices not only benefits our dedicated technologists but also leads to an overall improved expe

"Completing this advanced training marks a significant milestone for our team, further solidifying their expertise in mammography excellence."

The spokeswoman added that the training would help technologists at the charity provide accurate and precise screenings, which outcomes for patients.

Rona Donowa, chief technologist at the centre, said: "We are dedicated to providing the highest standard of care to our patients,

"By investing in the professional development of our team and adopting the Miller Method, we aim to elevate the level of care we satisfaction and wellbeing."
