

High-Risk Mammography Screening Protocols Checklist

DEFINED ELEGIBILITY CRITERIA

Patients may qualify based on:

- Elevated lifetime breast cancer risk
- Known genetic mutations
- Other high-risk factors identified through risk assessment
- Strong family history
- Prior chest radiation

PROVIDER INVOLVEMENT

A screening pathway should clearly define:

- Who can order the exam
- Required documentation
- Referral requirements
- Follow-up recommendations

STANDARDIZED WORKFLOW

Creating a consistent process helps ensure:

- Appropriate patient selection
- Reduced scheduling confusion
- Improved staff confidence
- Better patient experiences

GO BEYOND THE CHECKLIST.

Mammography Educators helps facilities develop customized breast imaging protocols tailored to their unique workflows and patient populations.
